An advantage in not belonging to one particular religious group is that a person is then allowed to read several versions of the Bible. This is basic if we ever expect to understand how different versions evolved and are related to each other. One version does not explain why Noah was born 1056 years after Adam, and another text says the flood was 251 years later, in 1307 years after Adam, why the original Septuagint text says the flood was 2262 years after Adam, and another tradition says the exodus was only 251 years later, in 2513 years after Adam.

The Massorah text says Noah's flood was 1656 years after Adam. The Samaritan text says Noah's death was 1657 years after Adam (1307+350). A Septuagint text says Noah's birth was 1656 years after Adam (2256 to the flood minus 600). This implies that Moses merely supplied the basic genealogies of Adam, Noah and Abraham without prohibiting future scribes from adding the years between each generation. Therefore, the three version of the Bible have different numbers between each generation.

### Entering the Age of Ancient Astronomy

There is ample evidence that the original version for dating major events, from Adam to Babel, to Abraham, to Joseph, to the exodus or to the temple was somehow defined by the 408 orbits of Venus every 251 years and the 36 orbits of Jupiter every 427 years (as in TABLE 1) assuming, of course, that the planets, including Venus and Jupiter, first appeared during the seven days of creation.

Jupiter, being the largest planet, was moving through the ancient skies and rising just before the sun every 12 years, and Venus was observed as an "evening star" and "morning star" by transiting across the sky near the sun 13 times in eight years, even before king Ammisaduqa of Babylon, long before the Israelites left Egypt. The bright Dog Star, Sothis (Sirius), rose in the east 366 times every 365 days as the Nile flooded Egypt.

**TABLE 1. The 590 years to the Temple**

251 yrs.	251 yrs.	251 yrs.	251 yrs.	251 yrs.	251 yrs.	251 yrs.	251 yrs.	251 yrs.	251 yrs.	251 yrs.	
<Adam			Fall of Babel		Joseph		Temple>				
			Flood	Abraham Ages 0-72-75		Exodus 1558 BC					
Pre-flood – 1656 yrs – (1708 – 52)				502 yrs		430 yrs					
427 yrs		427 yrs		427 yrs		427 yrs		427 yrs		427+52	
427 yrs		427 yrs		427 yrs		427 yrs		427 yrs		590	

After establishing a theory there were 427 years from the exodus from Egypt to the temple, someone likely insisted there were actually 479 years as in I Kings 6:1. This means that 52 years needed to be added. To maintain the original 427-year timeline in general, 52 years needed to be subtracted somewhere else. It appears that the solution was to subtract 52 years from the period before Noah's flood. Instead of it being 1708 years (427 x 4), it would become 1656 years.
