## SUMMARY OF CODE 490

### MISSING KEYS TO THE ANNALS OF THE WORLD 7, 49 and 251-Year Patterns in Genesis and Elsewhere

Floyd R. Cox

Google for “time of the end” and you’ll get 779 million hits. Now that is a real audience, and it seems that everyone now has a book spouting the latest theory. When will these events happen? Well, nobody really knows for sure. Instead, the world is full of speculators.

13.3 million Jews await the birth and first coming of their Messiah. 2.2 billion Christians await the second coming of their Messiah, and 2.1 billion Muslims await the coming of the Mahdi or twelfth Imam. This amounts to 4.31 billion people of the world’s 7 billion, mostly descendants of Abraham’s two sons, Isaac and Ishmael, who are speculating about some type of divine intervention from above.

One of the tools speculators use is time-patterns. If there is a Designer, there must be design. There must be a pattern found in the eras of the world.

To support this view, Jewish historians have recorded all kinds of patterns in chronology. For example, the temple was destroyed twice. Both times were in the same month, same week of the year, same day of the week, in the same year of the sabbatical cycle. Moreover, the Romans plowed Jerusalem on that same date at the end of the Bar Kochba revolt in 135 AD. Perhaps this is evidence of an Unseen Hand reaching into our world, leaving a mark on our doorpost or writing on our wall.

What we are about to explore in more detail is a curious, 251-year pattern which has been left hidden until now, a pattern which can be found in all the writings of Moses, from Genesis to the exodus of the Israelites from Egypt. Moreover, there is a 49-year pattern that is interrelated with it. Therefore, perhaps dates are based on mythology or numerology and are unreliable, or perhaps these are signs of a divine pattern.

#### From Abraham to Joseph

My first personal insight was found in a curious mathematical structure in the lives of Abraham, Isaac and Jacob. A reference book I found in a local library in 1980 said that Abraham’s life span equals  $5^2 \times 7$  (175 years); Isaac’s was  $6^2 \times 5$  (180 years), and Jacob’s was  $7^2 \times 3$  (147 years). The total life spans of all three, Abraham, Isaac and Jacob, equal 502 years ( $251 \times 2$ ).

I went home from the library and decided to see how far I could expand this pattern, but first I converted these square numbers ( $25 \times 7$ ,  $36 \times 5$  and  $49 \times 3$ ) into 175, 180, and 147 years, which equal 502 years. So the lives of Abraham, Isaac and Jacob covered 502 overlapping years, that is, 251 times two. Next, I found that Abraham was 100 when he had Isaac. Isaac was 60 when he had Jacob, and Jacob was 91 when he had Joseph; so there were 251 years from Abraham’s birth to Joseph’s birth, exactly half of 502 years. A verifiable pattern began to emerge in only one day of research. What next? Was there an important event 251 or 502 years before or after these patriarchs? How far could I expand this?
